<u>Food Chains and Webs</u>

<u>Food</u> <u>Chain</u> – feeding interactions between producers and consumers

<u>Example</u>:   **acorn**   –   **squirrel**   –   **wolf**
                  producer   consumer   consumer
                                    herbivore   carnivore
                                primary consumer   secondary consumer
                                      prey   preditor

<u>Cycling of Matter</u>

<u>Exit Slip</u>:
Create a food chain with a producer, primary consumer, secondary consumer, and decomposer. Explain your thinking. Add details below your animals.
